Rotary Serving Humanity

Last Week's Program:

Program Chairperson **Wendy Sideri** asked her husband, **Dave Sideri**, to introduce **Dr. John D. Young**, a renowned local physician who completed his residency as a Family Practice physician and then spent 15 years as an emergency room physician. He specializes in treating and curing chronic and genetic diseases, as well as various types of brain disorders through use of basic physiology and biochemistry, umbilical cord stem cell therapy and anti-microbial treatment. Dr. Young emphasized managing proper nutrition, herbal detoxification and orthomolecular therapy to repair damaged cells to cure the root cause of a problem or disease as opposed to simply treating the symptoms. He explained that unlike other stem cell treatments, umbilical cord stem cells are not DNA specific, meaning that they will work on people with any blood type. The philosophy of the Young Foundational Health Center is "treat the cell, heal the body." He provided a very impressive presentation.
